Residential & commercial air conditioning & air heating solutions

Stay Cool, Stay Warm and Stay Green:
Discover the Future of Energy-Efficient
Air Conditioning

■ About Us

Aquatec NW has been established since 2002 and has steadily grown its customer base, services, and geographic coverage. Throughout our business, we have a common objective: to offer the best possible experience to all our customers.

Fast forward to the present day, and we are now one of Stockport's leading heating and plumbing companies, as well as some of our local areas across Cheshire, Sale, Altrincham, Cheadle, Didsbury, and Chorlton.

When you come to us with your cooling and heating needs, you can expect individual attention and personalised services.

- ✓ **Installation**
- ✓ **Maintenance**
- ✓ **Breakdown**

■ We are F-Gas registered

Any business that carries out the installation or servicing of refrigeration, air-conditioning or heat pump equipment that contains, or is designed to prevent, F-Gas refrigerants, then by law, must obtain an F-Gas company certificate.

■ How does air conditioning work?

Air conditioning units work by removing the warm air from inside your home and pumping it outside while releasing the cool air back into the room, reducing the temperature.

When the liquid becomes gas, it absorbs heat; in principle, this is how it functions.

■ Our Services

01

Installation - Cool off in the summer, or warm up when it's chilly, with air conditioning that keeps you comfortable, whatever the weather outside. With a Worcester Bosch home air conditioning unit, you'll breathe easier too - with cleaner, filtered, circulated air, whenever you need it.

02

Maintenance - Regular maintenance of air conditioning units is crucial for their efficiency and longevity. Over time, dust and debris can hinder performance and affect air quality. Routine checks involve cleaning filters, inspecting coils, and ensuring drain channels are clear.

03

Breakdown - Breakdowns in air conditioning units can stem from wear and tear, poor maintenance, or factory defects, leading to issues like refrigerant leaks or electrical failures. When a unit exhibits signs of trouble, it's crucial to consult a professional quickly. Timely intervention can prevent extensive damage, prolong the unit's life, and maintain indoor comfort.

■ Residential

Worcester Bosch air conditioning & heating units are designed to be as quiet and unobtrusive as possible, so it's easy to forget they're even there. They were built with two operating modes: heating and cooling.

This means that on a warm summer evening, you'll get the perfect night's sleep thanks to the comfortable, cool air of Worcester Bosch air conditioning. Their heating mode also means you can use them all year round by switching to heat, perfect for those winter months.

■ Commercial

Installing comfortable cooling/ heating systems is their bottom line, as research shows that productivity can be increased by as much as 20% due to increased concentration, health and general well-being of employees.

People perform less effectively and less efficiently in extreme temperatures. When temperatures are too low, concentration levels fall. We can offer a complete service to help you decide on the best air conditioning system for your requirements.

The benefits

There are several benefits to having a new air conditioning system installed; whether your air conditioning unit is placed in a commercial or domestic setting, here are just some reasons why you should have a unit installed:

Numerous health benefits and cleaner air

Air conditioning ventilates and circulates throughout your home, drawing fresh air from the outdoors and filtering the air indoors.

Warm up or cool down

Air conditioning and heating can maintain a pleasant environment, whether summer or winter, without you having to do anything.

Ease of use

The controls for your unit are designed to be simply to operate and making adjustments to temperature is just one click away.

Control your allergies

With built-in air filters, our air conditioning units remove almost all the dust, smoke, pollen and other allergens so that you can breathe easier.

"Energy efficiency rating of A++ for cooling and A+ for heating."

FAQ's

We are here to help you from start to finish with your boiler finance options.

Opposite is some standard frequently asked questions with answers. Should you have any further, please call us on 0161 850 0858.

> **What is the advantage of choosing an energy-efficient air conditioning & air heating unit?**

The primary advantage is that these units use less energy, reducing your carbon footprint and saving you money on your energy bills. Additionally, you can benefit from 0% VAT on the installation of your new energy-efficient unit.

> **Is financing available?**

Yes, we offer monthly finance options for our customers. Whether you're looking to spread the cost over several months or even years, we have plans to suit your needs.

> **Are you F-GAS registered?**

Yes, and by choosing F-GAS registered engineers, you are ensuring that the individuals installing and maintaining your unit are fully qualified and compliant with the latest industry and environmental standards.

> **What guarantee is available?**

You can get up to a 5-year guarantee on your new energy efficient air conditioning unit

> **Are your accredited?**

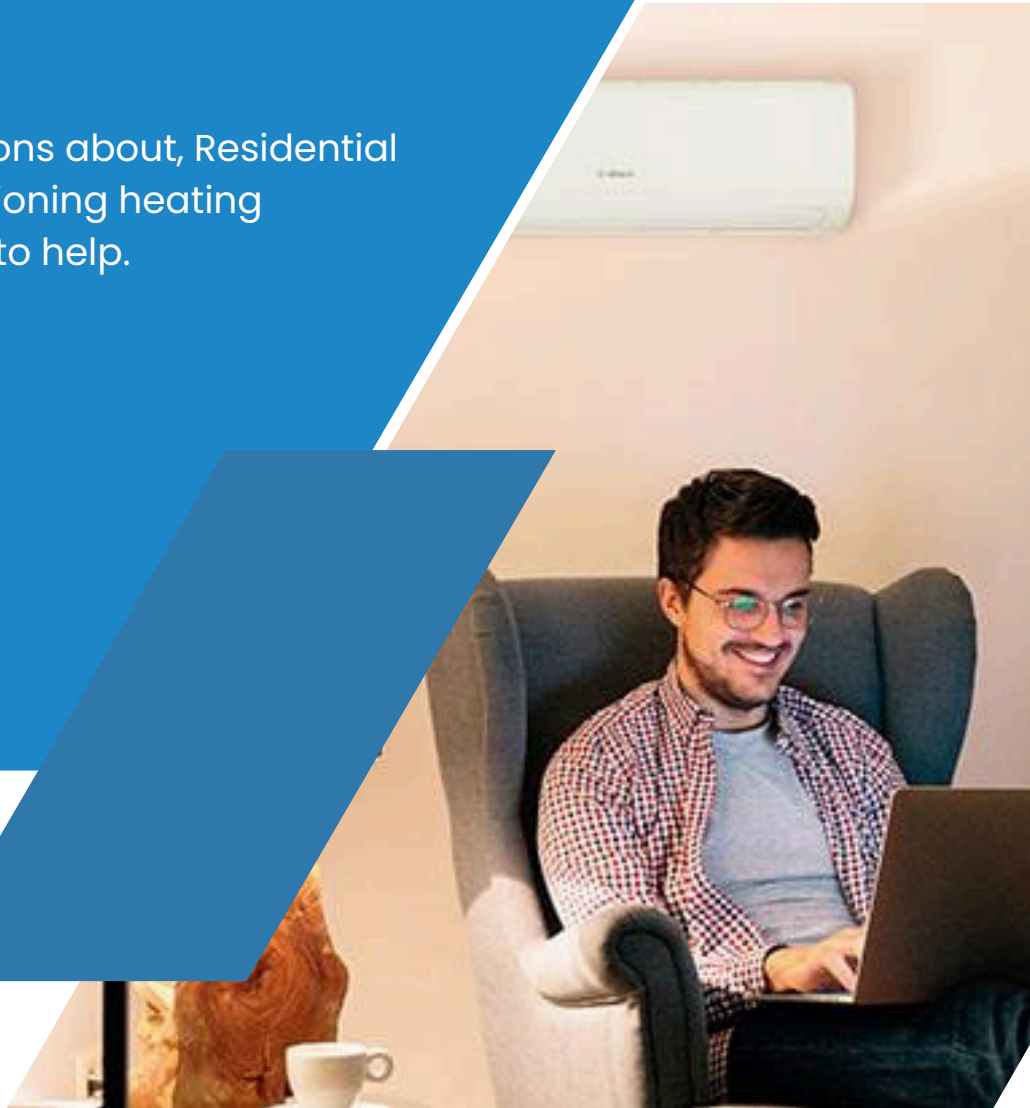

Yes, we are a Worcester Bosch accredited installer that can offer a range of exclusive benefits including extending guarantees and finance options.

> **Do they make lots of noise?**

We know that a good night's sleep is the reason that many homeowners install air conditioning, so we have also made sure that our systems are as quiet as possible too.
